Stepping up

Name: _____

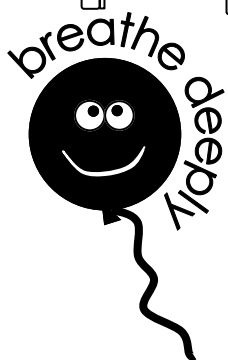

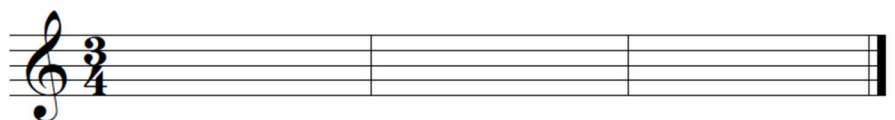

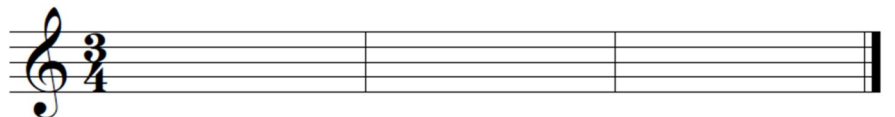

NMPAT Grade One Scales

People learn scales in different ways. Some people find looking at traditional notes easier, or you may find it easier to remember the patterns in the ladders. The highlighted boxes are the notes for the 'arpeggios'. Can you see a pattern...?

How many notes from the scale can you get without your instrument?

Write out the arpeggios under the
C Major and **A Minor** scales below:

Fill your lungs before you start to help you **float** to the top!

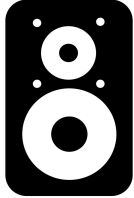

Dynamics

This word means all things to do with

Volume Control

We know how loud to play because there are letters that tell us. The letters stand for Italian words that mean quiet and loud etc.

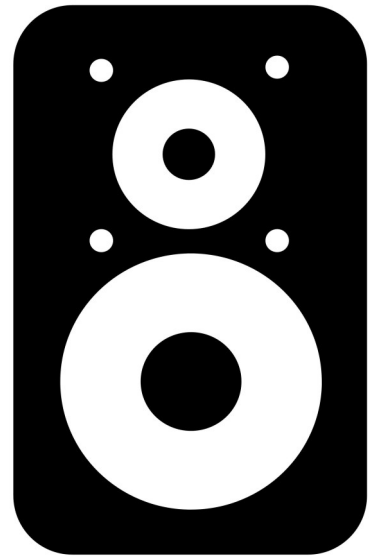

p ————— *mp* ————— *mf* ————— *f*

p = piano = quiet

m = mezzo = half (moderately)

f = forte = loud

Try this exercise in **all 4 ways**... tick it off once you've mastered it!

sing it

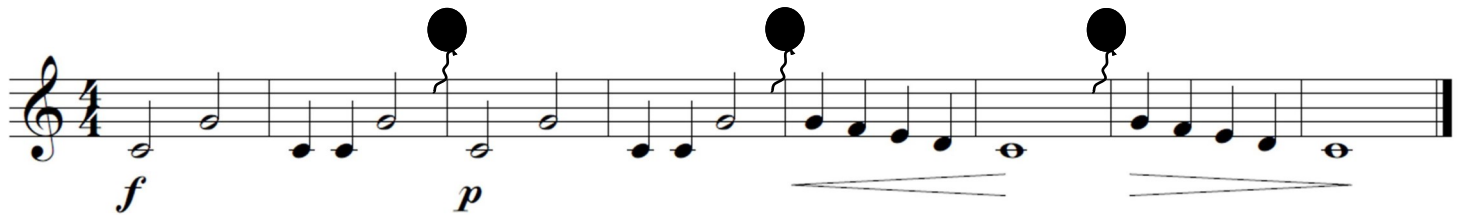

free buzzing

mouthpiece buzzing

buzzing in your instrument

Getting louder is called **CRESCENDO**
Getting quieter is called **DIMINUENDO**

Can you spot the **ARPEGGIO** in this one?

Old MacDonald

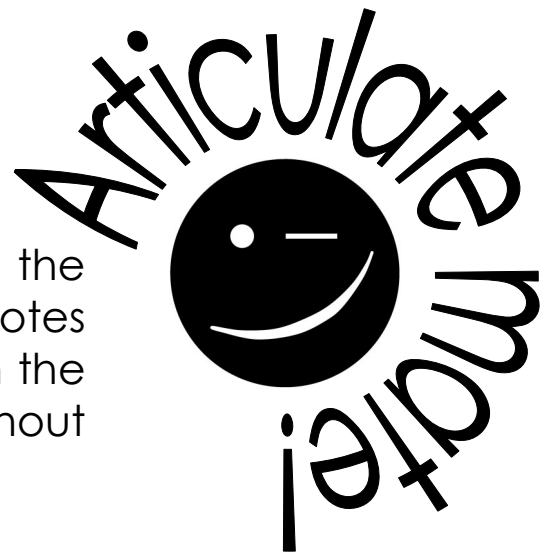

add your own DYNAMICS

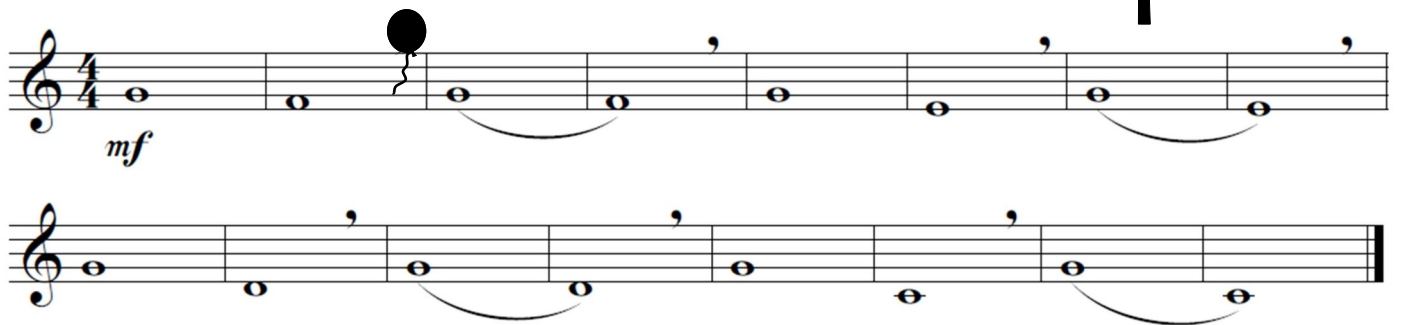

Breathe as deeply when you play quietly as you do when you play loudly!

Articulation 101

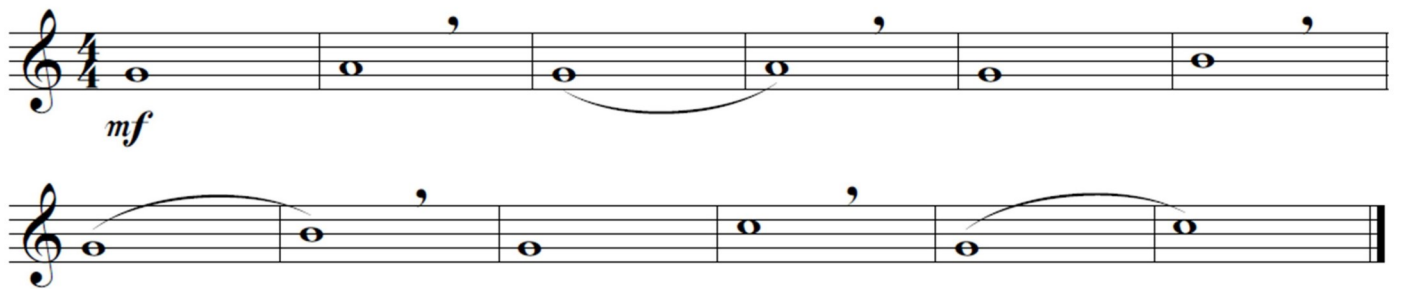

The Slur!

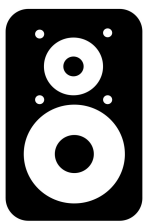

The big curvy line either over or under the notes means you have to 'slur' those notes together. So you play all the notes within the line without stopping blowing, and without using your tongue.

Once you feel confident try slurring up to some higher notes...

...and now with some of those DYNAMICS!

When you see the Articulate smiley,
why not add your own articulation...?

Articulation 102

Dots & Dashes

Staccato & Tenuto

A dot under or over a note is called **STACCATO**

Play these notes short and detached

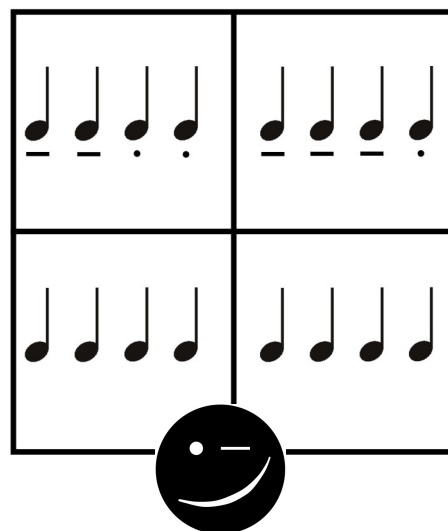

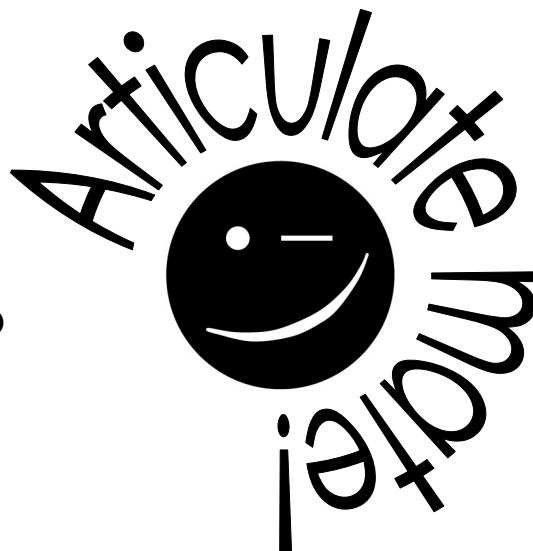

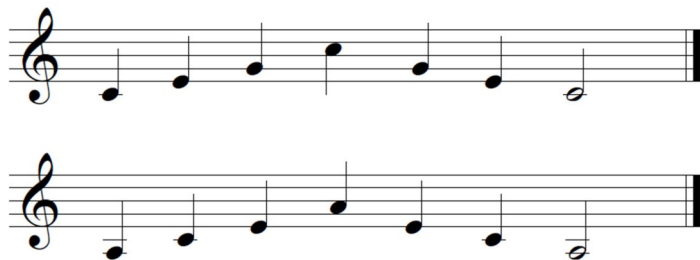

A dash under or over a note is called **TENUTO**

Play these notes sustained for their full length

Make sure you breathe as deeply
for both sorts of articulation!

Try playing these all TENUTO
Then play them all STACCATO

Old MacDonald's cousin from the North

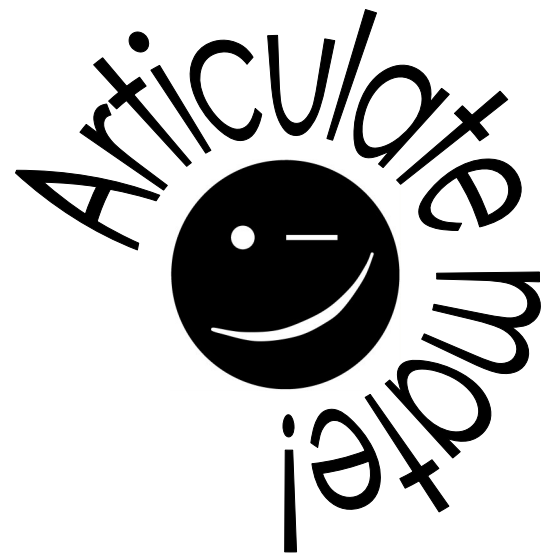

"Candyfloss"

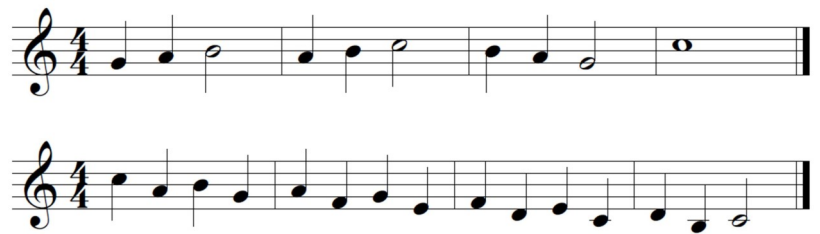

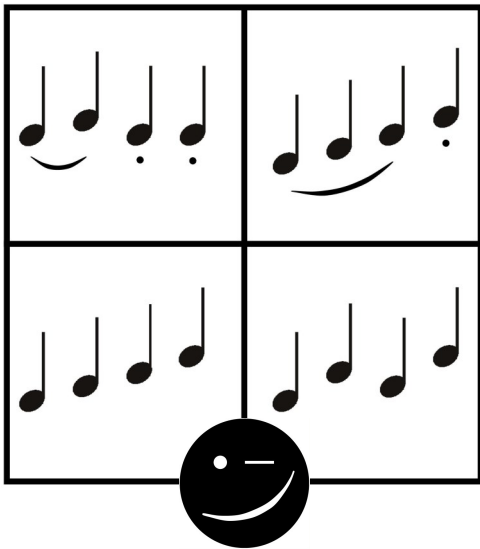

Articulation 103

Mix it up!

Staccatos & Slurs

Try playing up and down your scales using these patterns...

This Old Man

Frere Jacques

Count it out...1 + 2 + 3 + 4 +

A dot after a crotchet adds half a beat.

DOTTED CROTCHET

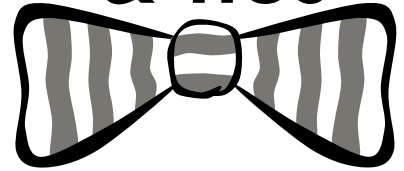

To make the rhythm add up to 2 beats we pair it with a quaver.

Dots...

& Ties

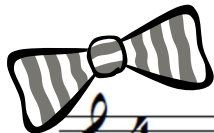

A **TIE** looks like a slur except it is only ever between 2 notes of the same pitch. Play them as one longer note.

All the boxes in this articulation grid add up to 4. Can you spot which ones would sound the same...?

London Bridge

When the Saints - write in where the ties should be...

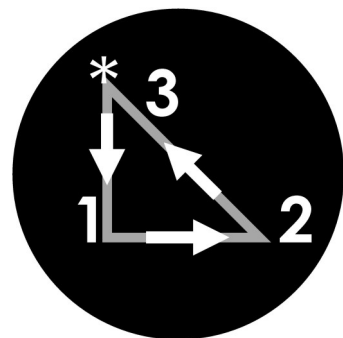

Dots, Lines and Spaces

3 beats in a bar

When you see the TIME SIGNATURE 3/4, it means 3 crotchet beats (quarter notes) in each bar. All of these lines fit together so you can play or sing them with your friends. You can also conduct while they play.

Try clapping these before you play them...

Nice cup of Tea

Our Dustbin

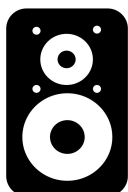

'I do what teacher tells me'

Fish and Chips

Thank you very much

Can you add some dynamics to these..?

Can you reach the top?
